

# PORTABLE TECHNOLOGY SECURITY

## Background

All staff using District information at a District location or otherwise are responsible for the management and safekeeping of information under their control by ensuring that there is adequate security to prevent unauthorized access, collection, use, disclosure or disposal of information.

Sensitive and confidential information stored on portable technology such as laptops, personal organizers, cell phones or memory sticks must be kept to an even higher standard due to the higher risk of equipment loss or theft.

## Procedures

1. All password protection mechanisms available on portable technology must be activated and utilized consistently and to the greatest extent possible. Industry standards/methods are to be deployed in the selection of appropriate passwords.
2. Work-related passwords shall not be shared with any other individual.
3. Any information that is no longer required on portable technology is to be transferred immediately to more secure electronic storage.
4. All security measures adopted for other technology use within the District apply to portable technology.
