

Blended Learning

The Grove Blended Learning program helps learners who enjoy flexibility, and the opportunity to socially interact, find success through personalized programming. We do this without the restrictions of a typical school day so learners can explore and engage in their community while actively taking part in their education.

School District

The Vision

Our curriculum is tailored to fit the needs of each student. We offer flexible programming that is responsive to the individual student and the interests of the class. Our blended learning opportunities enrich a child's openness to learning while developing caring and social relationships.

What guides our work?

In partnership with our community, we provide students with an alternative to the regular school programs by offering an opportunity to experience success in a safe, nurturing, learning environment that emphasizes social, emotional, and academic development.

Program Highlights

- Home learning with intentional time for social interactions
- Flexible and deeply individualized programming
- Multi-age classes
- Access to district wide services and supports.
- Responsive programming to student and group needs
- Small in person class sizes
- Opportunities for face-to-face learning opportunities

The Program

Our program is led by BC Certified teachers who provide families with resources and instructional support. Students, teachers and families work together to create personalized programs that follow the BC curriculum. This personalization allows students to learn and grow at their own pace. Students enrolled in our Blended Learning Program have access to optional field trips, workshops, and classes. Our students are also able to participate in district activities and events.
